Enterprise Modeling								
Diagram-based Enterprise Modeling: Describe enterprise process architecture with value chains that automatically create process and activity support relationships *	✓	✓	✓	✓	✓	✓	✓	✓
Align documentation with enterprise elements: Create a library of documentation to compliment the enterprise model *	✓	✓	✓	✓	✓	✓	✓	✓
Create multi-tiered enterprise landscapes: Design a balanced scorecard, control structure and risk catalog together with the process diagrams and models with which they are aligned *					✓	✓	✓	✓
Resource Modeling: Model organizational hierarchy, roles, groups and employees; apply RACI associations to any element of the enterprise *					✓	✓	✓	✓
Strategy and Goal Modeling: Define strategies and decompose them into goals and measurable actions *					✓	✓	✓	✓
Risks and Measures Modeling: Define and associate risks and measurements with any model object *					✓	✓	✓	✓
Project Management: Identify and define projects aligned with the enterprise model							✓	✓
Product and Service Modeling: Define products, services part lists and							✓	✓

*Requires iGrafx® Process Central®

Key Feature and Benefits	iGrafx® FlowCharter®	iGrafx® Process™	iGrafx® Process™ for Six Sigma	iGrafx® IDEF0®	iGrafx® Process™ for Enterprise Modeling	iGrafx® Process™ for SAP®	iGrafx® Enterprise Modeler	iGrafx® Enterprise Modeler for SAP®
associate to processes and value chains								
Model Management: Check model quality, compare and/or merge models							✓	✓
Reporting and Analytics: Build user-defined reports and matrices illustrating gaps and impact within enterprise models; perform SWOT analysis, advanced risk and measurement reporting							✓	✓
Integrate and manage SAP® Solution Manager Business Blueprint project data: Create and modify SAP business blueprint project landscapes and align them with other operational enterprise landscapes, create project documentation *						✓	✓	✓
Synchronization with SAP Solution Manager Business Blueprint: share project data and documentation with SAP Solution Manager								✓
SAP-specific analytics: perform analysis of SAP transactions' and resources' impact on business process landscapes								✓
Ease of Use and Productivity								
Automatic lines: Line routing, skips and junction dots all done automatically	✓	✓	✓	✓	✓	✓	✓	✓
Auto-grow shapes: Shapes expand automatically as text is entered	✓	✓	✓	✓	✓	✓	✓	✓
Automatic connection Connection lines are automatically drawn	✓	✓	✓	✓	✓	✓	✓	✓

Key Feature and Benefits	iGrafx® FlowCharter®	iGrafx® Process™	iGrafx® Process™ for Six Sigma	iGrafx® IDEF0®	iGrafx® Process™ for Enterprise Modeling	iGrafx® Process™ for SAP®	iGrafx® Enterprise Modeler	iGrafx® Enterprise Modeler for SAP®
Multiple page support: Ability to work with multiple pages in a single window	✓	✓	✓	✓	✓	✓	✓	✓
Dynamic Page Size: Lack of barriers enables greater focus on capturing process knowledge	✓	✓	✓	✓	✓	✓	✓	✓
Themes: Pre-defined color themes produce higher quality process maps and models	✓	✓	✓	✓	✓	✓	✓	✓
Export Report Data: Improve understanding of test results through extensive testing in third party applications		✓	✓		✓	✓	✓	✓
Import Actual Process Data: Improve accuracy of results through use of empirical data	✓	✓	✓	✓	✓	✓	✓	✓
Visio® Import: Reduce development time by leveraging legacy content	✓	✓	✓	✓	✓	✓	✓	✓
Instant Web and Microsoft® Office® Publishing: Improve visibility and compliance through easy knowledge sharing	✓	✓	✓	✓	✓	✓	✓	✓
Explorer: Easily visualize and navigate even complex models	✓	✓	✓	✓	✓	✓	✓	✓
Quick Zoom: Zoom-in and pan-out to navigate and edit large, complex diagrams	✓	✓	✓	✓	✓	✓	✓	✓
Simulation							✓	✓
Integrated Reporting: Understand change impact in real time		✓	✓		✓	✓	✓	✓
User Definable Modeling Data:		✓	✓		✓	✓	✓	✓

Key Feature and Benefits	iGrafx® FlowCharter®	iGrafx® Process™	iGrafx® Process™ for Six Sigma	iGrafx® IDEF0®	iGrafx® Process™ for Enterprise Modeling	iGrafx® Process™ for SAP®	iGrafx® Enterprise Modeler	iGrafx® Enterprise Modeler for SAP®
Improve accuracy of results through increased resemblance of model to real-world								
Multiple Scenario Analysis: Identify optimal changes through comprehensive parameter testing		✓	✓		✓	✓	✓	✓
Analyze Multiple Runs in a Single Report: Leverage high-impact changes through side-by-side comparisons		✓	✓		✓	✓	✓	✓
Simulation timeframes from 1/10 second to years: Increase scope of process improvement through a wider range of processes analyzed		✓	✓		✓	✓	✓	✓
Live Process Analysis Shapes: Visually demonstrate bottlenecks and process behavior		✓	✓		✓	✓	✓	✓
Methodology Support								
Lean Tools and Value Stream Mapping: Improve manufacturing and transactional processes using state-of-the art techniques	✓	✓	✓	✓	✓	✓	✓	✓
BPM Tools: Bridge gaps from business to IT through standards and 'execution ready' diagrams	✓	✓	✓	✓	✓	✓	✓	✓
Design of Experiments: Identify optimal changes by designing and performing full factorial experiments in a risk-free environment			✓		✓	✓	✓	✓
Data Fitting: Improve accuracy of results through statistical fitting of empirical data			✓		✓	✓	✓	✓

Key Feature and Benefits	iGrafx® FlowCharter®	iGrafx® Process™	iGrafx® Process™ for Six Sigma	iGrafx® IDEF0®	iGrafx® Process™ for Enterprise Modeling	iGrafx® Process™ for SAP®	iGrafx® Enterprise Modeler	iGrafx® Enterprise Modeler for SAP®
Dynamic, Data-Driven Cause & Effect and Pareto: Reduce development time and increase usability of key analysis tools	✓	✓	✓	✓	✓	✓	✓	✓
Integration with MINITAB® and JMP®: Reduce project time and errors through a direct integration with leading statistical analysis tools			✓		✓	✓	✓	✓
IDEF0 Model Setup Wizard: Reduce model setup time				✓				
IDEF0 Rules Enforcement: Ensure compliance with IDEF0 standards				✓				
Customizable Model Templates: Reduce model development time and ensure compliance with standards				✓				
IDEF0 Glossary: Improve model comprehension				✓				
IDEF0 FEO, Text and Node Tree Diagrams: Improve model comprehension and clarity				✓				
SAP ASAP methodology: Ensure accurate and up-to-date documentation of SAP implementation projects *						✓		✓
